The economical solution

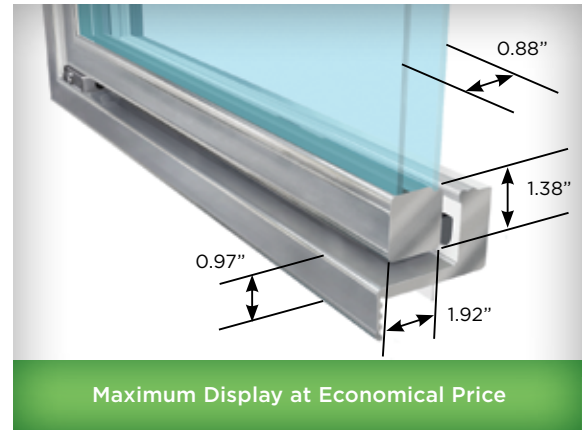

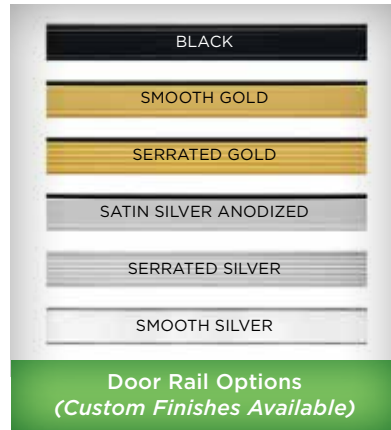

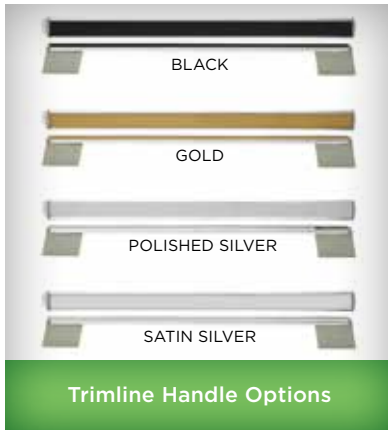

Open the door to value and quality with Anthony's 401 Series doors. Designed as an entry-level door for applications requiring strong, robust and economical doors while still providing the value, wide range of sizes and multiple options that customers have grown accustomed to with Anthony.

- Wide range of sizes and options
- Increased viewing area for optimized merchandising
- Durable construction for long life
- LED lighting optional

401 Series | Proven Reliability

401 Series doors are the smart, economical choice for entry-level doors. You get high-quality design, construction, features and options normally found only in much more expensive door models. The 401 will bring you years of reliability and cost-effective performance.
